

# Claiborne Van Voorhis

Chantilly, VA | (703) 595-5107 | [cvanvoorhis2@gmail.com](mailto:cvanvoorhis2@gmail.com) | [LinkedIn](#) | [GitHub](#)

---

## Education

**College of William and Mary**, Williamsburg VA  
Bachelor of Science in Computer Science

May 2024

---

## Experience

**FORTE** – Remote

June 2022 – August 2022

*Paid Internship*

- Collected Emails for music teacher marketing outreach campaign, resulting in over 100% increase in outreach database by targeting and extracting relevant contact information from online music directories and educational websites by creating a web scraping script in Python
- Attended daily engineering scrum meetings

**ID.ME** – Tysons Corner, VA

June 2021 – August 2021

*Member Support Representative*

- Provided mission-critical identity verification support to members and returned a working solution
- Verified member identification and followed verification procedures
- Updated documentation and playbooks as necessary and facilitated communications through Slack/JIRA

**ACRE INVESTMENT MANAGEMENT** – The Plains VA

June 2019 – August 2019

*Digital Asset Manager*

- Migrated all digital media assets to single cloud-based solution and organized assets with metadata
- Trained and onboarded team members to new cloud solution
- Created portals for various clients that needed access to specific media from the main library

---

## Achievements

**Software Engineering Class MVP**

- Recognized for outstanding, quality contributions to the project including code written and establishment of core functionality to the project (nbdev) and nominated for academic paper and presentation at a conference

---

## Projects

**Java Plugin**

- Designed and implemented custom plugin for Minecraft servers using Java to add a backpack functionality for players in a Minecraft game server
- Published source code on GitHub for anyone to use: <https://github.com/claibornevv/backpacks>

**Personal Containerization/Virtualization Environment**

- Designed and implemented personal containerization/virtualization environment utilizing Proxmox to manage multiple linux instances and containers efficiently
- Aided in development of other personal projects

**Discord Bot**

- Programmed personal discord bot using Node.js and the Discord.js library to manage multiple discord servers

---
